Pro-Watch®

**Pro-Watch® 4.X Eco System
Training Syllabus**

**For
Advanced Training 2 day's Session**

Version A / 2019

Scope:

The purpose of the Pro-Watch Eco Advanced training course is to introduce the experienced Pro-Watch Eco certified engineers with advanced features of Pro-Watch and to provide in depth knowledge of the supporting operating system and databases.

Requirements:

Participants to this course should comply to the below mentioned pre-requisites;

- Own a recent training certificate of a "Pro-Watch Ecosystems" training course.
- The certificate should be acquired at least more than 6 months before applying for the Pro-Watch advanced course.
- The student must have working knowledge on
 - Installing and maintaining Pro-Watch
 - Installing and maintaining Windows Operating systems and network architectures
 - Fundamentals in Transact SQL.

Subjects covered:

- Panel Procedures/Interlocks
- Troubleshooting
- Database Structure
- DTU Import/Export
- Advanced Reporting tools
- System and database maintenance

Training structure

This 2 day training session will combine in-depth lectures given by our trainers with hands-on sessions. During the course of discussing the various topics, we will build simulations that will provide real-life hands-on experiences for the students.

The Schönaich Training Facility

The Bracknell Training Facility
