LobbyWorks™

1 day Session

Version A / 2019

One day "Pro-Watch Visitor Manager LobbyWorks" Training

Pre-requirements:

Participants to this course should preferably have working knowledge of

- PC and Windows 7/8.1 or 10 and/or Windows Server 2012 / 2014 operation.
- TCP/IP Network topology.
- SQL knowledge is of advantage but not mandatory

Objective:

This training course is intended for installers, service technicians, and Administrators of Pro-Watch Visitor Management Systems.

At the end of the course all students will receive a complimentary Documents and Tools package which contains Product documentation, product related tools, presentations, and a fully operational Pro-Watch Visitor Manager Professional Suite 90 day's trial version.

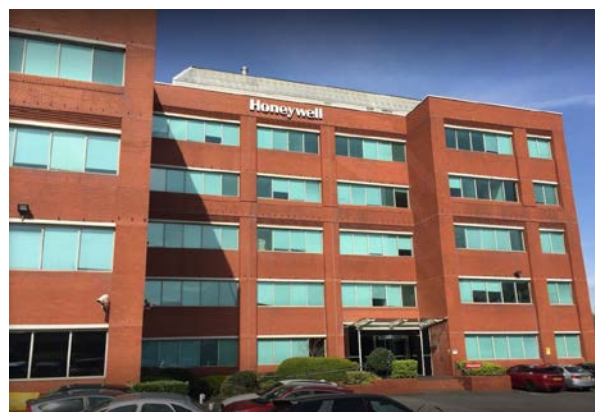

Session Duration

The time period to be reserved for this training session is 1 full day (9:00 – 16:00) where this day will have (2) intermediate breaks and a lunch.

Travel for participants will have to be scheduled in such way that the participating engineer(s) will have sufficient time to complete the full training course. Participants who have to leave before completing the online test at the end of the day will not receive their proof of certification.
